

## Personal Website – User Feedback

### Einleitung

After completing the first version of the website, it was important to gather user feedback in order to optimise/adapt the website in line with UI/UX principles.

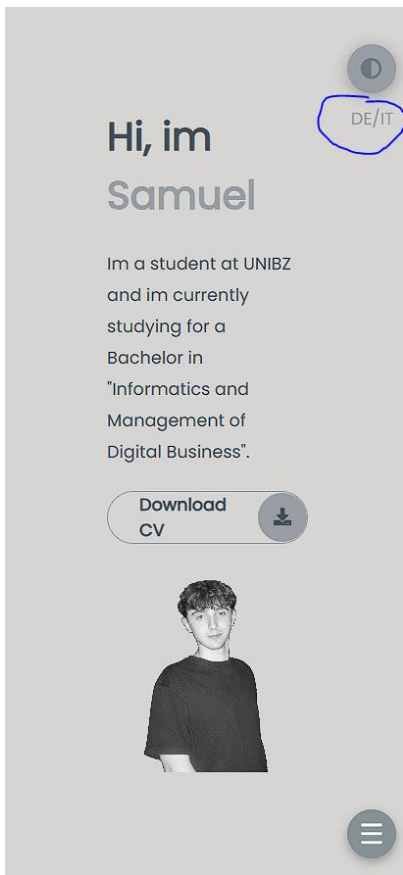

The following four users were asked for their opinion regarding the website.

User	Role (generic)	Context	Key finding (paraphrased)	HCI theme	Action taken
User A	Graphic Designerin (Stocker Lana)	Small viewport (mobile)	- „Text in Contact (email) squshed together“	Cognitive load	Correct text for small viewport
User B	Deputy CEO + Hiring Manager	Large viewport (desktop)	- „Website only available in english“	Content	Implementing additional 2 webpages in german/italian
User C	computer science student (University of Vienna)	Small viewport (mobile)	- „Text in Contact (email) squshed together“ - “navigation slightly shifted on mobile”	Cognitive load/ Structure	Repairing the navigation so that it is in one line with the burger icon
User D	Employee (VOG Terlano)	Both	- „Website only available in english“	Content	Implementing additional 2 webpages in german/italian

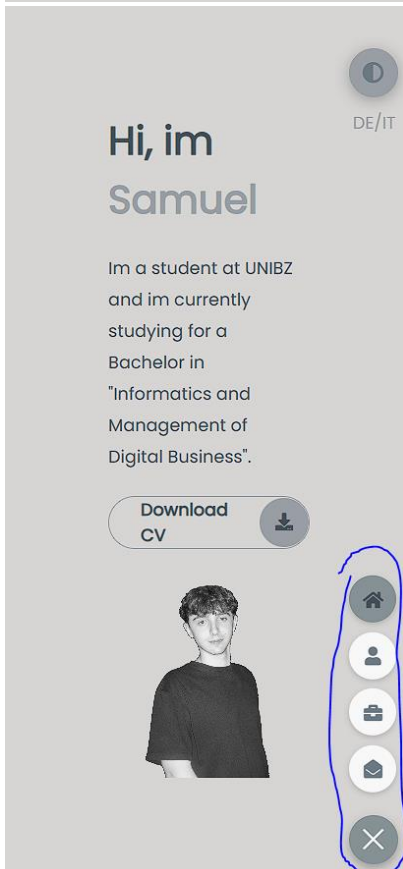

As a result, most of the imperfections can be found in small viewports (mobile). Language availability, on the other hand, affects all viewports.

Samuel Soini

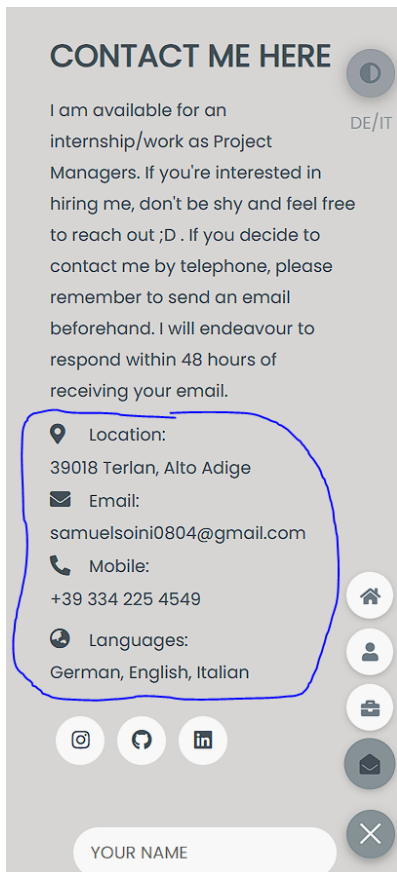

Changes made:

1. Additional links that load the website in English, Italian or German (depending on your preference).

2. The navigation for mobile devices has been adjusted so that the icons now lie perfectly above the navigation button.

3.

Changed the text of the contact information so that the text is no longer squashed and extends beyond the viewport width.
